EDUCATION

University of North Carolina at Charlotte, NC

Jan 2023 – May 2024

Masters in Information Technology

TECHNICAL SKILLS:

- **Programming languages:** Java, JavaScript, Python, C, TypeScript.
- **Frontend Technologies:** HTML5, CSS3, React.js, Next.js, Redux, Zustand, React hook form, Angular, Tailwind CSS, Material UI, Bootstrap
- **Backend Technologies:** Spring Boot, Spring MVC, Node.js, Express.js, Hibernate, JDBC, JPA, RESTful APIs, SOAP Services, Kafka,
- **Testing & QA:** JUnit, Jest, Selenium, Cucumber, SonarQube, Cypress, Tosca, Test-Driven Development (TDD)
- **Databases:** MySQL, Oracle, Microsoft SQL Server, MongoDB, PostgreSQL, NoSQL, Firebase.
- **Tools and Platforms:** Git, IntelliJ, VS Code, Jupyter Notebook, Maven, Jira, Jenkins, Docker, Tosca, Linux, Ubuntu
- **Cloud Computing:** AWS (EC2, Lambda, S3, EKS, RDS, IAM), Azure Fundamentals, Kubernetes (EKS), GCP (Cloud Foundations), Postman, JWT, CI/CD.
- **Other Skills:** Agile (Scrum), API Integration, Figma, Authentication & Authorization, Responsive Design, Technical Documentation

WORK EXPERIENCE

Full Stack Developer, TGS Technology LLC, Charlotte, NC

Jul 2024 – Present

- Developed and deployed scalable modules for an Election Management System using Java, React.js, TypeScript, and Spring Boot, improving system reliability by 40%.
- Engineered modular UI components with React Hook Form, Zustand, and Material UI, reducing form-related bugs by 30% through reusable logic and collaboration with QA teams.
- Integrated secure JWT authentication and Keycloak-based RBAC, enabling 100% compliant access control across user roles; worked closely with DevSecOps to align with security standards.
- Enhanced backend APIs using JPA, Hibernate, and JDBC, reducing database response time by 35%; leveraged AWS RDS for scalable cloud-hosted data access.
- Coordinated with DevOps to maintain and improve CI/CD pipeline reliability using Jenkins, Bitbucket, and Maven, reducing rollback errors and streamlining deployment flows.
- Evaluated deployment bottlenecks and containerized services using Docker, deploying to AWS EKS for 99.9% uptime; analyzed usage metrics to fine-tune infrastructure with EC2, Lambda, and OpenSearch.
- Implemented unit and integration tests with JUnit and Jest; achieved 95% test coverage across critical modules, validated code quality with SonarQube.

Web Developer Intern, TGS Technology LLC, Charlotte, NC

Jan 2024 – Jul 2024

- Collaborated with a 3-member team to develop a React and Node.js application integrated with SQL Server, analyzing user input patterns to enhance ChatGPT-powered AI dialogues and increase engagement by 40%.
- Reduced response times by 25% through optimized AI-driven dialogues, enhancing overall user experience and efficiency.
- Spearheaded a rehabilitation platform that analyzed client input data using ChatGPT APIs to generate personalized textual responses, enhancing counsellor engagement and boosting interactions by 60%.

Full Stack Engineer, Cognizant Technology Solutions, Tamilnadu, India

Aug 2021 – Dec 2022

- Refined a test result management and VDI monitoring application using React and Spring Boot, improving user satisfaction by 40% and system stability by 35%.
- Integrated Jira APIs into custom dashboards, enabling testers to update ticket status directly from the UI and reducing ticket handling time by 35% through cross-team automation efforts.
- Collaborated with QA leads to deliver interactive dashboards featuring real-time execution logs and visualizations, enhancing test visibility, and debugging efficiency by 30%.
- Revamped a major telecom client's Tosca testing framework and fine-tuned SQL queries, accelerating data access by 20% and improving testing accuracy.

Web Developer Intern, Cognizant Technology Solutions, Tamilnadu, India

Jan 2021 – Aug 2021

- Collaborated in developing web applications using React, Spring Boot, and MySQL, troubleshooting UI and API issues to improve feature reliability across modules.
- Refined Spring Boot services and SQL queries within a collaborative environment, boosting data efficiency by 30% and improving backend response times.
- Built responsive UI components with JavaScript and CSS while learning Agile and participating in code reviews.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Microsoft Azure Fundamentals: AZ900
- Programming, Data Structures and Algorithms: NPTEL
- Tricentis Tosca Automation Specialist 1 & 2
